COMMERCIAL.

MARKETS.

TUESDAY, JULY 1, 1866. We do not intend to publish in our paper at present a price current, but merely to note from week to week any changes in the leading articles of domestic and foreign merchandise or produce. As no exchange exists in our city as in commercial ports generally, it is much more difficult to determine what are the rehable quotations of the various articles in the market. Still in

many articles of domestic produce a reliable wholesale figure can be given, based on actual transactions.

During the summer months, or from May to Sept., this market is exceedingly dull for trade of every description as our ports are then almost entirely descried by shipping, confining the trale mostly to the few native coasters, and an occasional merchant ship. Hence more business is transacted in October, than during the five preceding months. The importations of late, however, have been quite large, and fully equal to those of any previous year, and it is quite probable, from present advicesthat they will continue so to the end of the year.

FLOUR .- The market has become quite bare, the late importalions having been small, and the stock is principally in the hands of bakers. The Mill Co. will probably commence grinding in a few days, and will more than supply the demands of the traic, provided an article is manufactured equal to last years

product. of new wheat, which was not of the best quality. It is held at

the price per bushel for good wheat at Kahulai. Barley and lead, 5 bags turnips. oats have begun to come in also. Held at 4 @ 5 cents per lb. SUGAR & MOLASSES .- The export of sugar during the past at 7 @ 71 cts per lb. No. 2, 51 @ 6. The stock of syrup and molasses is large. The former is quoted at 371 cts. per gallon. Mol 135es 25 @ 28 cts.

FIRE WOOD .- About 250 cords in the market, held at \$11. We notice a sale of 20 cords at \$10 per cord, at auction.

OIL .- The stock now held here is not more than sufficient to whaling fleet. The surplus stock was mostly shipped by the S. S. Bishop to New York, and by the Fanny Major and Frances Palmer to San Francisco.

BUILDING MATERIALS.-Large importations have recently been received from Puget Sound, and California, and several cargoes are now on their way from the former place. The stock of shingles on hand is estimated at 600,000. We quote shingles at 0 @ \$7 per M., and rough pine boards at 4 @ 41 cents per

POTATOES. - During the past month no shipments of potatoes have been made to California. The new crop of Koloa potatoes we understand are ripe and fit for market, but the low price at | Cheroots, 1703 gals. molasses, 1020 bags brown which they rule in San Francisco must prevent any shipments thither at present. By the latest advices from that port, we learn that sweet potatoes were dull at 2 and 21 cents per pound. do, 1 cart, 2 wheels, 6 cases whiskey, 20 cases old Tom gin, 2 cs. The Molokai and Niihau potatoes shipped over by recent vessels | Brandy, 2 cases Brandy bitters. qualities of the Koloa potatoes are much superior. The Yankee the Native Agricultural Society, and the same have been distributed on the different Islands, to improve the crop. We see no reason why by the introduction of proper seed, the best quality of petatoes cannot be raised here. We quote petatoes at \$1 00, per bbl at the beach at Koloa.

EXCHANGE ON U. S .- Very limited transactions in Exchange have been made during the past month, and mostly at par. We quote whalers bills at par @ 1 per cent premium. Sight exchange drawn to suit, @ 2 per cent premium. Drafts on San Francisco at par.
